Frontend Web Developer / QA Test Analyst

ABOUT ME

I am a self taught web developer with experience using the most up to date technologies . I developed my knowledge through a combination of self-led study, online courses, and building projects for clients . I am a fast learner and critical thinker with a growth mindset.

Currently working as a QA Test Analyst in an eCommerce company. I have got experience building web applications with responsive landing pages and enjoyable UX/UI, testing software and developing extensive reports for improvement.

WORK EXPERIENCE

Next, Leicester, Enderby: Trainee QA Test Analyst

OCT 2020 - CURRENTLY

- Working within a large team under the Agile Methodology.
- Develop a test plan with test requirements, test approach and scope of testing, technologies used and write a final report and review of the features functionality.
- Delegate with developers, POs, and PMs to ensure good quality software is being delivered.
- Communicate quantitative and qualitative findings from test results to the development team.
- Identify areas for improvement to boost the product's efficiency.

University of Nottingham, Nottingham: *Social media adviser*

NOV 2019- JUN 2020

- Developing the social media platforms of the Students Careers and Employment Services at the University of Nottingham.
- I was working with a team of three people analysing and finding better ways of delivering excellent and engaging content for the students in the university.
